

SOCIETY OF PHYSICS STUDENTS at UNM

About us

The Society of Physics Students is a national organization whose only requirement to join is an interest in physics. SPS exists to help students transform themselves into contributing members of the professional community and to provide resources to help members pursue their interest in physics.

The UNM chapter of SPS has meetings every week to discuss community out and inreach, do physics related projects, and to enjoy the company of other students passionate about physics. Participating in SPS means the chance to talk with UNM physics professors you might otherwise not meet, doing projects that put physics concepts in your hands, getting to see demonstrations on the different aspects that go into pursuing a career in physics, and building relationships with the undergraduate students of the physics department.

Our chapter is totally free to join and how often you attend meetings is up to you!

Meetings

When : Every Friday at 2:30 pm

Where: Physics and Astronomy building room 190

Website: <https://unmsps.wixsite.com/unmsps>
President: Eric Putney (eputney@unm.edu)

2018 Physics Day hosted at UNM with support from SPS students.

The rocket car demonstration of Newton's third law presented by SPS members during the 2017 fall demo show.

An SPS meeting where we enjoyed good snacks, company, and a round of Physics Karaoke!

The UNM and ASU chapters met to discuss our goals as individual chapters and as a zone. The campus and lab tours were a plus!
